**BAWLEY POINT & KIOLOA COMMUNITY ASSOCIATION  
GENERAL MEETING**

**MINUTES**

**MONDAY 16 APRIL 2018**

**Meeting of the Committee held at the Community centre at 7.45 pm**

**There were present:** J Stanwix (Chair), T Beckett, L Butler, B Ellis, M Heath, R Lucas, D Nicholls, C Jansma Smith

**In attendance:** Clr Kaye Gartner (Ward 3) and 4 others

**1. Apologies**

Apologies were received from: S Betts, J Langlois, K Wardner-Brown

**2. Minutes (Attachment 1 pp 7-12)**

Minutes of the General Meeting held on 19 February 2018 were attached for approval

**MOTION:** That the Minutes be accepted

**MOVED:** L Butler      **SECONDED:** M Heath

**CARRIED**

**3. Correspondence (Attachment 2 13-14 )**

Correspondence received since the General Meeting on 19 February is listed in the two Correspondence Logs attached. The Secretary ([secretary@bawleykioloa.org.au](mailto:secretary@bawleykioloa.org.au)) may be contacted for an email copy of any particular item

**4. Treasurer's Report (Attachment 3 pp15)**

The Treasurer's Report was tabled for approval

**MOTION:** That the Treasurer's Report be accepted

**MOVED:** R Lucas      **SECONDED:** D Nicholls

**CARRIED**

## 5. General Business

### 5.1 Community Connect

The following Report from Barrie Ellis was noted

#### **Funding:**

Michael Strachan visited last week and confirmed that Council has provided additional funds to complete to Sand Mines. Effectively this means that we can acquit Veolia's grant, use Council funds and leave the money raised by Sport and Recreation untouched.

The Council has taken responsibility to complete the Culvert in the July/August time frame. It will place a marker on the northern side to which our current work will concrete to. It will also concrete from the southern side of the culvert up to the northern side of Peter Cosgrove's drive way.

Council will clear the shrubbery along Peter Cosgrove's fence, evaluate the large gum tree on the northern side of his drive way and remove it if it considers it is a long term threat to the integrity of the path. It will also assess whether Peter Cosgrove's drive ways surface is solid enough to allow safe passage of bicycle's traversing it. I have also requested an assessment be made of the Parish and Armstrong driveways.

The only issue with Council doing the shrubbery is timing. As Michael does not control the resources that do this work I am holding the option of doing it with our own contractors so we can meet our project time frame.

The next pour will be undertaken by the RFS on 21 April, weather permitting

#### **Kioloa:**

Michael believes that there is funding this FY for the section from Kioloa Caravan Park to Butler's Creek reserve. The budget figures I have put together for this work is circa of \$24,000. Both RFS captains have agreed to provide human resources.

The Caravan Park may lose some parking space as cars will be required to parallel park rather than angle park. However the value of the path, particularly as it makes it way to Mud Holes will be a great value offset.

I await Michael's confirmation that he has budget for this work now I have given him approximate figures.

#### **ANU**

Steve Berkhout has agreed in principle to allow the path to access and egress the ANU in two places:

\* Mud Holes Carpark south to approximately past the ANU gate then back to the road verge.

\* Butler's Creek Bridge, to the left of the Kioloa Sign to egress out into Butler's Creek Reserve.

( I have cut a bridle trail through the bush which with some small effort could become a walking track in the interim)

Steve is required to seek agreement of his ANU Board in Canberra. To enable this approach, Council is required to provide a map of both sections with the proposed route. Michael has this on his to do list.

ANU has a process including flora evaluation as of course does Council. Hopefully these reviews do not throw up any immovable road blocks. Timing of the ANU process is unknown at this point.

### **Route confirmation.**

Once the ANU routes are finalized then the total route can be confirmed.

### **Resources:**

Charlie and Russell have committed their respective teams to get us to Sand Mines and if money is available, complete Kioloa. Cec Skwarko has said he will participate in a pour "to keep the momentum going" should he be needed.

The Men' s Shed is still committed to providing the formwork however with its own project of shed completion together with all of the fund raising activities, it is experiencing significant resource contention. Equally, the RFS has not been required to attend any fires which has given it the opportunity to work on the path. However this situation as you will appreciate is not a given.

The meeting agreed to a Vote of Thanks to the RFS, to the "Mum's Pour" and others involved.

## **5.2 NBN / Mobile Black Spot Update**

The following report from Barrie Ellis was noted

### **Mobile Black Spot**

The site at ANU is confirmed and VisionStream has an approved DA to proceed. Yes, VisionStream sent letters outlining the development, then another letter some months later saying there were no objections. The Men Shed received one as we are a neighbour of ANU. I am not sure many in the community would see this as consultation. The site at ANU is confirmed and VisionStream has an approved DA to proceed. Yes, VisionStream sent letters outlining the development, then another letter some months later saying there were no objections. The Men Shed received one as we are a neighbour of ANU. I am not sure many in the community would see this as consultation.

### **Coverage:**

Any mobile implementation cannot guarantee 100% area coverage as there are geographical obstacles such as hills and vales that will affect reception.

Telstra assures me it has done its best to maximise coverage but as you will appreciate sometimes the best sites are not commercially available.

"Go live" is expected at the end of June.

### **NBN**

Bawley Point:

NBN Fibre to the node was implemented around July 2017. Fibre connection from the Thrush Street Exchange to its national network connection at Termeil was complete in December 2017.

Bawley Point residents who have accepted offers from retail Telecommunication companies to connect to the NBN have had varied experience, usually unacceptable delays and very poor service.

NBN speeds have been less than impressive and as expected there has been much finger pointing between NBN and retail telecommunication providers.

Rod Simms, Chairman of ASIC has indicated that the retail Telecommunication companies had purposely sold plans that NBN could not support and ASIC had intervened and the Telcos had refunded money. The upshot is that the BP customer experience has been a mixed bag, usually bad. Consequently it is still recommended that residents do not move to the NBN until it is absolutely necessary.

Kioloa:

NBN has advised that it intends to dig in fibre to Kioloa to connect it to the Thrush street exchange and provide fibre to the node services similar to those provided to Bawley Point. There has been some delay due to access to an agreed route and it is hoped to start work in July 2018.

Residents should be mindful that with the advent of a mobile tower in the Kioloa area in the near term( see note above) 5G mobile broadband will be offered as a competitor to NBN sometime in 2019. Even NBN has admitted that it may lose upwards of 15-20% market share to mobile broadband.

### **5.3. Junction of Bawley Point Road and Princes Highway**

It was noted that the RMS team had installed three No Standing signs as seen below. A watching brief will be kept on the effect of the signs.

#### **5.4 Councillors Visit**

The Councillors' Visit finally took place on 6 April. Justin advised that he and Carrie had accompanied the Bus (which was an hour late) on a whirlwind tour.

Carrie noted that there was a need to alert Council immediately about the suggestion that a Portaloo be installed at the Gantry during the Summer.

#### **5.5 Provision of exercise equipment and fitness posts across the area**

It was noted that action is continuing

#### **5.6 Local Medical Practice**

Justin reported that the Sussmans remained keen and would bring a proposal forward to a future meeting. Council was, however, determined that without rooms, there could be no doctors and it was not possible to change the terms of Scott Brown's approval.

The Association's Committee had drawn a line under managing a community practice.

### **6. Other Business**

Clr Gardner asked that the letter about Portaloo's go out the following day as Council was finalising the budget for its summer plan. The hygiene problems that had led to suggestion were, unfortunately, common in all the coastal councils.

Tim advised that an ANU lecturer who ran student tours out of the ANU Coastal Campus had asked for access to the Association's Agendas and Minutes for research purposes. The request was approved as these documents were publicly available.

Mary Stanwix noted that the roadside bins were being roughly handled by the collectors and some were being damaged. Council would be advised.

## **7. Next Meetings**

**Committee: Monday 4 JUNE 2018**

**General Meeting: Monday 18 JUNE 2018**

**BAWLEY POINT & KIOLOA COMMUNITY ASSOCIATION  
GENERAL MEETING**

**MINUTES**

**MONDAY 19 FEBRUARY 2018**

**Meeting of the Committee held at the Community centre at 7.45 pm**

**There were present:** J Stanwix (Chair), T Beckett, L Butler, B Ellis, M Heath, R Lucas, C Jansma Smith and 11 others

**1. Apologies**

**Apologies were received from** S Betts, J Langlois, D Nicholls, K Staples

**2. Minutes**

**Minutes of the General Meeting meeting held on 20 November 2017 were attached for approval**

**MOTION** That the Minutes be accepted

**MOVED** M Heath      **SECONDED** R Lucas

**CARRIED**

**3. Correspondence**

Correspondence received since the last General Meeting was noted

**4. Treasurer's Report**

The Treasure's Report was tabled for approval

**MOTION** That the Treasurer's Report be accepted

**MOVED** R Lucas      **SECONDED** L Butler

**CARRIED**

**5. General Business**

**5.1 Community Connect**

The following report from Barrie Ellis was noted:

**Stage 1: Voyager to Sand Mines.**

This section of the path has been totally funded with the assistance of the grant from Veolia. To meet the grant requirements of completion in 12 months, this section has to be finished by end August 2018. However the funding is predicated on the work being done by volunteers.

Cek Sqwarko and Steve Taylor laid about 93 metres of path in December 2016. In November 2017, Willinga park laid another 97 metres. In February 2018, Bawley Point

RFS laid approximately 54 metres and plan to do some more pours in the near term weather permitting.

Consequently the CC Committee are hopeful that we will achieve the completion of Stage 1 by end August 2018 with volunteer labour.

### **Reality Check:**

Until Willinga Park and the RFS stepped up to assist, the project looked dire in terms of being completed. There was a realisation that the assumption that the local builders and others would replicate what was achieved at the Bawley Point end some 12 years ago was not going to happen.

The Men's Shed team which completed the majority of the Kioloa footpath have an average age of 76 years and whilst they are not out of it totally, cannot work in the hotter months. Equally the Men's Shed members were spending many hours trying to achieve an Occupancy Certificate for their shed thus limiting their time for other activities.

The weight of evidence suggested that the Committee needed to find a different strategy other than local volunteers if the path between the two settlements was to be completed in a reasonable time frame.

### **Grants:**

It was agreed that the Committee should work with Council to approach both the State and Federal Governments to see what grants would be appropriate to complete the path using commercial contractors.

Council recognising the effort this community had made over the last 14 years has moved the project onto its PAMPS program with the intention of finding a way to fund the project. In the interim, the Council has agreed to survey the route and resolve any land issues that may emerge.

Currently the Committee is evaluating The Federal Government's *Building Better Regions Fund* (BFF) which is a \$481.6 million fund specifically aimed at building stronger regional communities.

## **5.2 NBN / Mobile Black Spot Update**

The following report from Barrie Ellis was noted:

Consultations with TELSTRA and ANU Southern Campus indicate that commercial terms are proceeding for a site adjacent to the existing University network tower.

TELSTRA has proposed a 40 metre mono pole to support its transmission equipment and connection back to the mobile network will be either by fibre or microwave.

The TELSTRA Mobile Blackspot website is suggesting that that design in complete and that the site will be a substation usually meaning back up battery and diesel generation if electrical power is lost. The website also suggests that transmission will commence in the first half of calendar year 2018.

As this program is funded by the Federal Department of Communications and Telstra is simply a subcontractor engaged to build this site, I have asked the Department to clarify if other Mobile operators will be invited to install subsequently.

### **Coverage:**

Any mobile implementation cannot guarantee 100% area coverage as there are geographical obstacles such as hills and vales that will affect reception. Telstra assures me it has done its best to maximise coverage but as you will appreciate sometimes the best sites are not commercially available.

### **NBN**

Bawley Point:

NBN Fibre to the node was implemented around July 2017. Fibre connection from the Thrush Street Exchange to its national network connection at Termeil was complete in December 2017.

Bawley Point residents who have accepted offers from retail Telecommunication companies to connect to the NBN have had varied experience, usually unacceptable delays and very poor service.

NBN speeds have been less than impressive and as expected there has been much finger pointing between NBN and retail telecommunication providers.

Rod Simms, Chairman of ASIC has indicated that the retail Telecommunication companies had purposely sold plans that NBN could not support and ASIC had intervened and the Telcos had refunded money. The upshot is that the BP customer experience has been a mixed bag, usually bad. Consequently it is still recommended that residents do not move to the NBN until it is absolutely necessary.

Kioloa:

NBN has advised that it intends to dig in fibre to Kioloa to connect it to the Thrush street exchange and provide fibre to the node services similar to those provided to Bawley Point. There has been some delay due to access to an agreed route and it is hoped to start work in July 2018.

Residents should be mindful that with the advent of a mobile tower in the Kioloa area in the near term( see note above) 5G mobile broadband will be offered as a competitor to NBN sometime in 2019. Even NBN has admitted that it may lose upwards of 15-20% market share to mobile broadband.

### **5.3. Junction of Bawley Point Road and Princes Highway**

The following report from Barrie Ellis was noted:

Trucks parking on the Prince's Highway at the corner close to Bawley Point Road on the northern side obstruct seeing cars driving south.

RMS agreed to evaluate the corner prior to Christmas 2017. Its preliminary view was that installing "no stopping signs" from the corner going north about 30 metres might be the solution.

In response we have suggested that the area is useful as a lay away for traffic including buses plying the South Coast route. Consequently we have encouraged the RMS to consider meeting both design goals of safety and continued use with perhaps bollards in a triangular shape together with no parking signs on the Princess Highway thus forcing vehicles to park at least 30 metres from the junction of the two roads.

We are awaiting RMS response and scheduling of the work.

#### **5.4 Councillors Visit**

It was noted that Council had advised that the annual Councillors Visit which was scheduled for 26 November was now postponed to a date to be set in February 2018. As in the past the Committee will prepare a list of talking points to be sent to Councillors in advance with the state of the Community's roads being a major issue identified. No other specific items were raised

#### **5.5 Provision of exercise equipment and fitness posts across the area**

It was noted that action was continuing

#### **5.6 Gantry**

It was noted that Considerable action has been taken by Council to delineate car parking areas and the Committee is monitoring activity on the Bawley Point Headland

#### **5.7 Retirement of Local Doctor**

It was noted that at its meeting on 5 February 2017, the Executive Committee of the Association agreed that the replacement of the local doctor was outside its capacity. It was agreed that Council would still be asked if there were any sites where zoning would allow the establishment of a practice and Tim would talk to Darryl Leslight about the conditions required for a practice to be established at the shops.

The meeting was concerned to ensure that the local pharmacy would remain in business and agreed that it was unlikely that the doctor's departure would have a major impact on business.

### **6. Reports**

#### **6.1 Shorebirds and Graffiti**

The following Reports from Marg Hamon were noted

##### **Shorebird Report - Bawley Point/Kioloa Area**

This season has not been a very successful one for the Hooded Plovers. We started monitoring the pair J7 and B0 in August, but it wasn't until 11/10 that they laid their first eggs on Murramarang Beach. This nest was taken by a fox on 25/10. The pair then moved to Avenue Beach at Kioloa and nested again on 13/11. This nest, in spite of being caged, was taken by an unknown predator, probably a bush rat, on 25/11. They then moved to Racecourse Beach and made another nest on 14/12. This was also taken by a fox. it has been a bad year for fox predation right up and down the coast. At the time of

writing this pair doesn't seem to have another nest, but will be monitored as it is still possible they could try again.

Meanwhile, at Dawson's Beach (four beaches south of Pretty) the pair H7 and M4 nested on 12/10/17 and hatched 2 chicks from 3 eggs on 3/12/17. One chick disappeared on 17/12 but the other survived to fledge, we hope. At the time it was expected to fledge the coast was hit by a big swell and king tides, making the area too difficult to access. The sea also wiped out a Red-capped Plover nest on Island Beach. Island Beach was also the site for a Pied Oystercatcher nest in August 2017. This nest was lost just before hatching, possibly to a fox.

There are some more fledglings in the South Coast area, but both eggs and chicks elsewhere were impacted by the cold weather and enormous swells.

### **Graffiti Report**

The good news is that there has been relatively little graffiti over the holiday season, just some minor scrawls on signs, mainly at Mudholes and Sandmines car parks. There is also some on a rock at Mudholes which we haven't been able to remove. The main incident came after the holidays, with the WIRES sign on Bawley Point Rd being defaced. Luckily it was easily cleaned off. Don't forget we have a Parkcare/Graffiti team in our area so please report any graffiti so it can be dealt with swiftly.

### **6.2 Bawley Pt and Kioloa Bushcare Groups - Update**

The following Report from Sybille Davidson was noted

During 2016 – 17 our small bands of bushcarers have continued to make inroads into the invasive species that turn up in our remnant patches of Council-managed bushland reserves. We combat exotic weeds invading these patches, often as a result of garden waste dumpings; seed is also spread by birds and wind.

The B Pt group usually meets once a month, teaming up with Cate Brooks, our Council support staffer who brings with her appropriate environmental credentials. When carrying out bushcare weeding it is important to correctly identify the target weeds and become familiar with the most effective tactics for each species.

Our main focus areas are remnant patches of native bushland that are basically in good nick and just needing an occasional re-visit. We prioritise bushland designated as EEC (Endangered Environmental Community) and nearby areas.

Our usual sites are: Bangalay Sand Forest at Gannet and Cormorant Beaches; the wetland periphery close to Cormorant Beach, and the Willinga Lake catchment at the edge of Shearwater Crescent. These are sites that suffer from inappropriate garden waste dumping – or have in the past.

Over some years we are pleased to note at these sites that we have had some good successes; we have substantially reduced the occurrence of many invading exotic garden escapees such as Asparagus fern, Bridal Creeper, Cassia, Creeping Charlie, English Ivy, German Ivy, Dolichos Pea, Formosa Lily, Sailor Boy Daisies, Spider Plant, Agapanthus and Fishbone Fern. One species that is frustratingly persistent is Mother-of-Millions, a succulent from Madagascar that can poison horses and cattle. It turns up not only in sand vegetation near beaches, but also on all of our rocky headlands. We have reduced its density in many sites, but there are still a lot of pockets of this menace that bounce back when you are "not looking".

Council gives us backing in the form of a regular paid support officer, equipment, occasional extra contracted workers for designated broad scale weed treatments, and support in seeking funding for bigger projects (we sought and were successful in 2008-9).

The Kioloa group meets at various times, as notified by Barbara White. Barbara and her troops have been waging an unrelenting war on *Aristea ecklonii* (the blue flowering lily from Sth Africa), Formosa Lilies, Asparagus fern and Cassia, where they have invaded in hind dune reserves and O'Hara Headland, but also along village surrounds.

If you are interested in helping to retain the integrity of our native bushland patches near our beach reserves, please join us for a couple of hours about once a month. The B Pt group usually convenes on a Monday afternoon.

For enquiries about either group please call Sybille Davidson 0488 274527. We can arrange for you to register as a bushcare volunteer, for either Bawley Pt or Kioloa (Registration as a bushcarer is essential for clearing any vegetation in our reserves).

May we also suggest – Please don't plant invasive exotic species in your garden; they can and do escape into the bush. Grow Natives instead! Check out the Milton-U'dulla Landcare Nursery in Deering St.

Most especially we remind owners and residents (and their garden maintenance contractors) that the dumping of ANY garden waste, including lawn clippings, is not only totally illegal, it is a disaster for our lovely bushland.

Absentee property owners!!! Do you know where YOUR mowing/gardening contractor disposes of YOUR lawn clippings?

It was suggested that Council be approached to conduct another composting workshop if there were sufficient people interested

## **7. Other Business**

### **7.1 Watson Family Seat**

It was agreed that this was a good idea and the seat should be placed along the middle of Skerri Drive. It was noted that there was a need to comply with Council requirements and any variation would have to be sent to Council for approval.

### **7.2 Rubbish on Beaches**

Liza suggested that Maggie Mudge be invited to a future meeting to present on the collection of rubbish off beaches.

### **7.3 Old Gantry Remnants**

Barrie asked if the Gantry Committee could reconvene to decide what to do with the remnants of the old Gantry currently being stored in the Men's Shed

## **8. Next Meetings**

**Committee: Monday 9 April 2018**

**General Meeting: Monday 16 April 2018**
